Redefining Healthcare Management

In the complex ecosystem of modern healthcare, efficiency, accuracy, and integration are paramount. Smart Medical is a comprehensive, web-based ERP solution engineered to streamline the entire operational flow of a hospital.

This unified platform synchronizes clinical, financial, and administrative functions onto a single, coherent system, replacing disparate silos of information. Our mission is to empower healthcare providers with data-driven insights for superior patient care and robust operational health.

Single Source of smooth patient Journey

A unified journey from admission to discharge, driven by clinical excellence for optimal outcomes, reinforced by absolute financial control and administrative efficiency.

FACILITY & BED MANAGEMENT

BLOOD BANK MANAGEMENT

Unified Patient Journey

At the heart of Smart Medical is a centralized Electronic Medical Record (EMR). This core module facilitates:

Master Patient Index (MPI)

Outpatient Department (OPD) Management

Inpatient Department (IPD) Management

Appointment & Scheduling

Billing & Insurance Integration

Outpatient (OPD) Management

Unified Patient Identification

Generate a unique patient ID to prevent duplicates, create smart barcode ID cards, and maintain a single, comprehensive medical record.

Automated Scheduling & Payments

Manage doctor appointments with auto-serial, process consultation and investigation payments, and seamlessly track referral fees.

Smart Communication & Reporting

Utilize automated SMS/email notifications and generate a variety of detailed reports for enhanced patient engagement and operational insight.

Automated Admission & Bed Allocation

Streamline patient intake and automatically assign beds, wards, or cabins based on live availability.

Centralized Records & Consent

Maintain all patient data, diseases, and digitally signed consent forms in one unified record.

Efficient Discharge & Billing

Instantly generate final bills, discharge summaries, and necessary certificates.

Real-Time Census & Reporting

Monitor ward occupancy and access key patient statistics instantly for operational insight.

Inpatient (IPD) Management

OT Management

Orchestrate the entire surgical process from scheduling to follow-up for optimal efficiency.

Centralized OT Scheduling

Manage pre-OT bookings and agreements seamlessly. Configure OT setups with ease for different surgical procedures.

Patient & Performance Tracking

Monitor both current IPD and discharged patients for complete follow-up. Generate detailed reports filtered by date, OT, doctor, or referring agent.

Integrated Post-Op Care

Maintain a seamless continuum of care by tracking patient recovery and outcomes directly linked to the surgical event within the system.

Emergency & Consultancy Management

Manage the full spectrum of patient intake, from unscheduled critical cases to planned specialist consultations.

Streamlined Emergency Response

Prioritize speed and efficiency for critical cases with rapid patient registration, instant triage, and real-time coordination of beds and resources for life-saving interventions.

Structured Consultancy Workflow

Systematize scheduled care with automated doctor appointments, referral management, and seamless access to patient history, ensuring a smooth and informed consultation process.

Streamlined Clinical Workflow

Connect all clinical departments for faster, more accurate diagnostics.

01

Radiology Information System (RIS):

Manages medical imaging orders, reports, and archives.

02

Laboratory Information System (LIS):

Automates the workflow of the pathology lab from sample collection to result dispatch.

03

Pharmacy Management:

Handles drug dispensing, inventory, and integrates with e-Prescriptions.

Comprehensive Financial Suite

Gain complete control over your hospital's fiscal health with integrated modules for:

Billing & Invoicing

Accounting & Financial Reporting

Insurance & TPA Management

Cost Analysis & Budgeting

Essential Support Modules

Powerful support modules that automate core administrative functions, ensuring clinical staff can focus entirely on patient care.

Inventory & Store Management

Purchase & Vendor Management

Fixed Asset Management

Human Resource & Payroll

Specialized Management

01

Eye Care Management

Vision centers suite, managing consultations, optical sales, and lens prescriptions.

02

General Pharmacy Shop

Streamline retail pharmacy operations with inventory, sales, and supplier management.

03

Optic Shop Management

Integrated system for frame inventory, sales, and workshop order within eye care facilities.

04

Blood Bank Management

Maintain blood inventory, track donors, and cross-matching for safe transfusion services.

Intelligence of a Unified System

Modules don't just connect; they collaborate intelligently to automate workflows and eliminate data silos, with key features accessible directly from our mobile app for ultimate control.

Event-Driven Automation

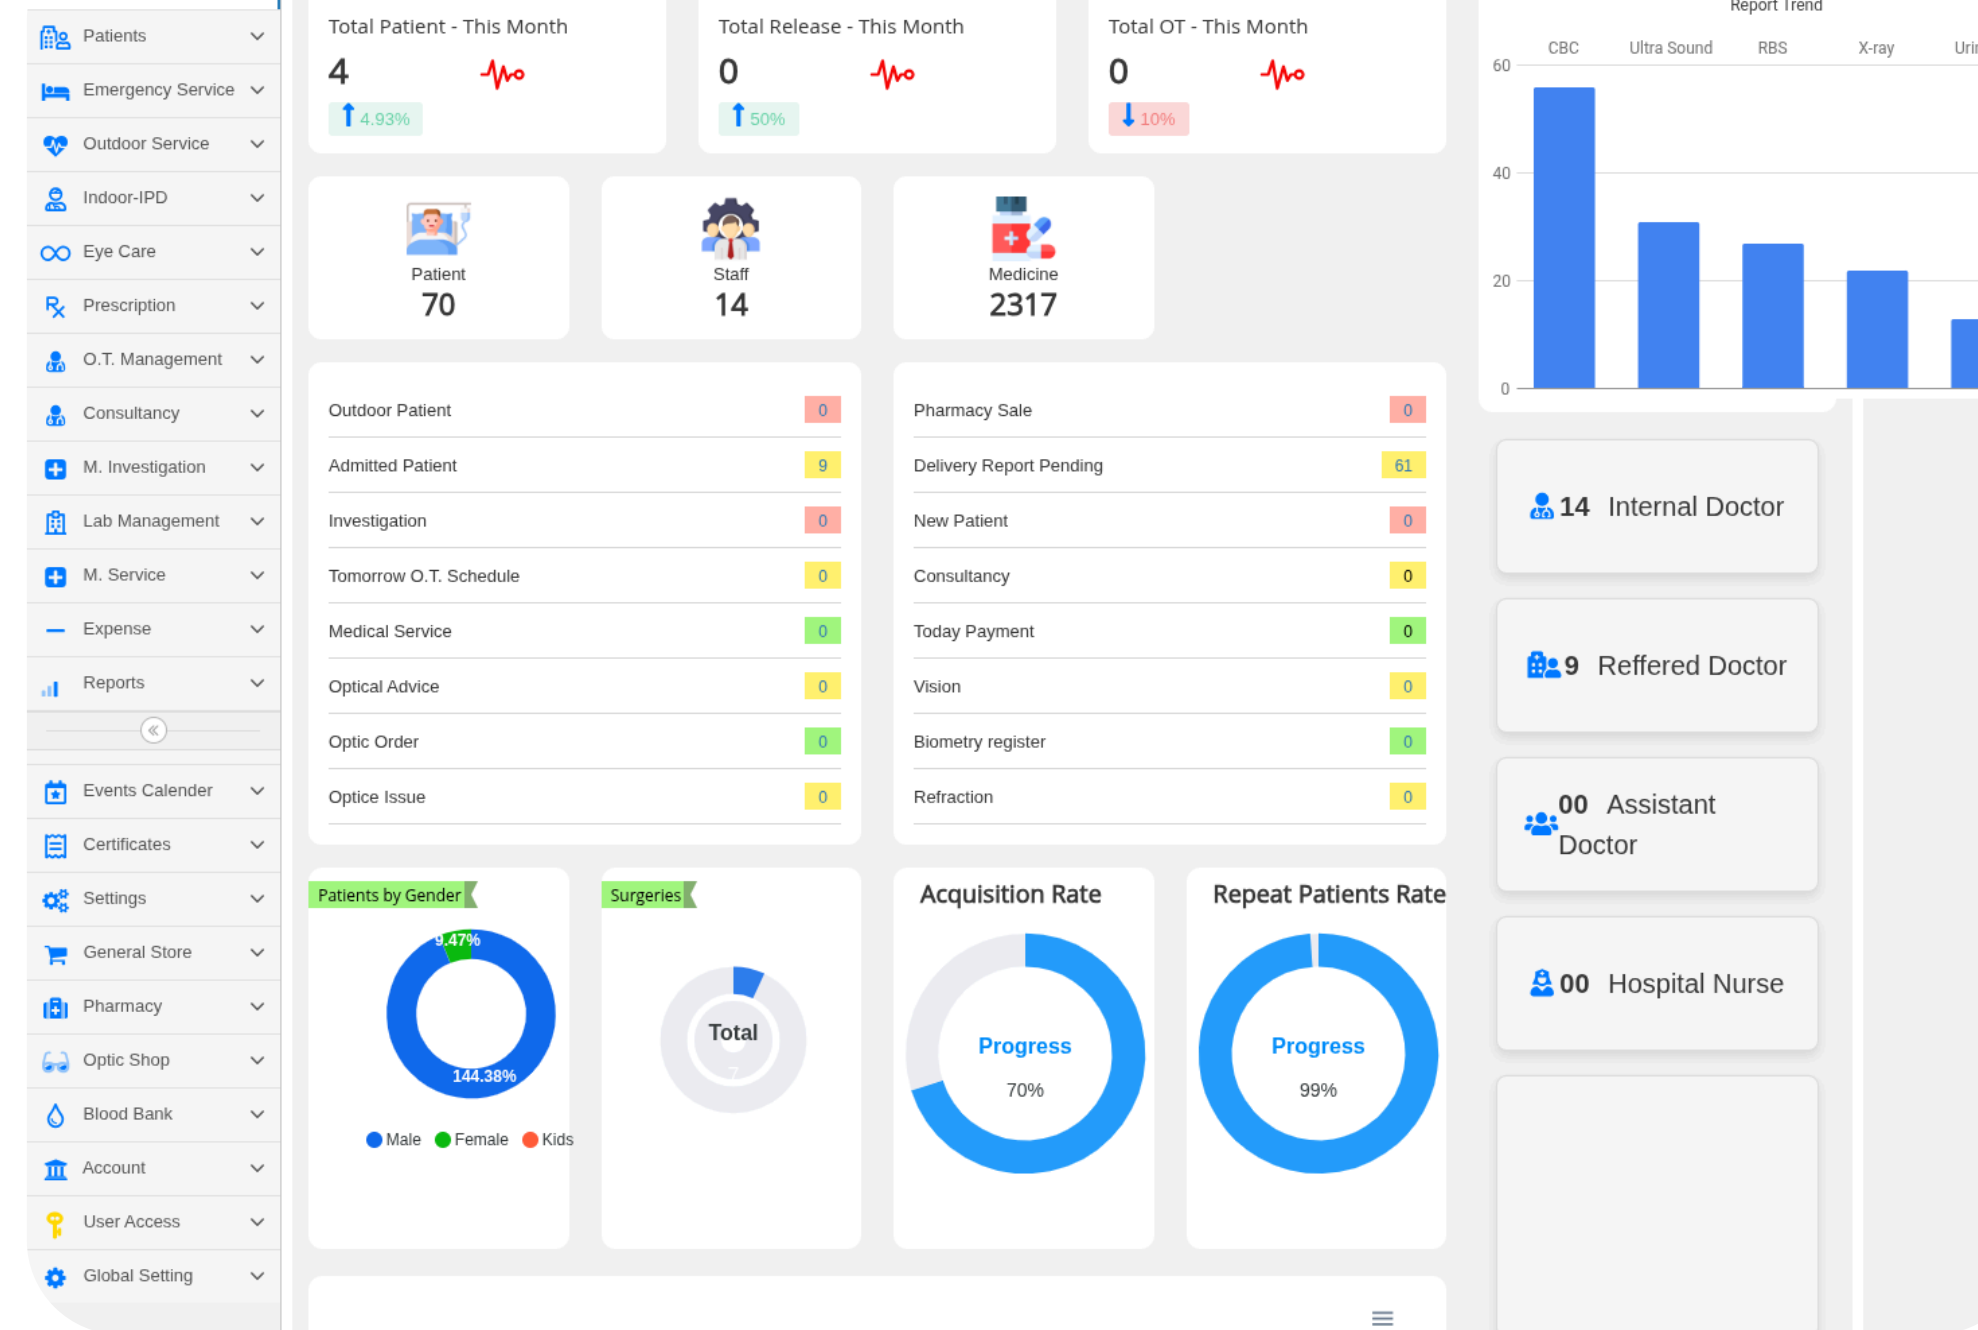

Automatically triggers actions across departments, like notifying housekeeping upon patient discharge to reduce turnaround time.

360-Degree Operational View

Links clinical activity directly to financial and logistical data for real-time, holistic decision-making.

Mobile Accessible

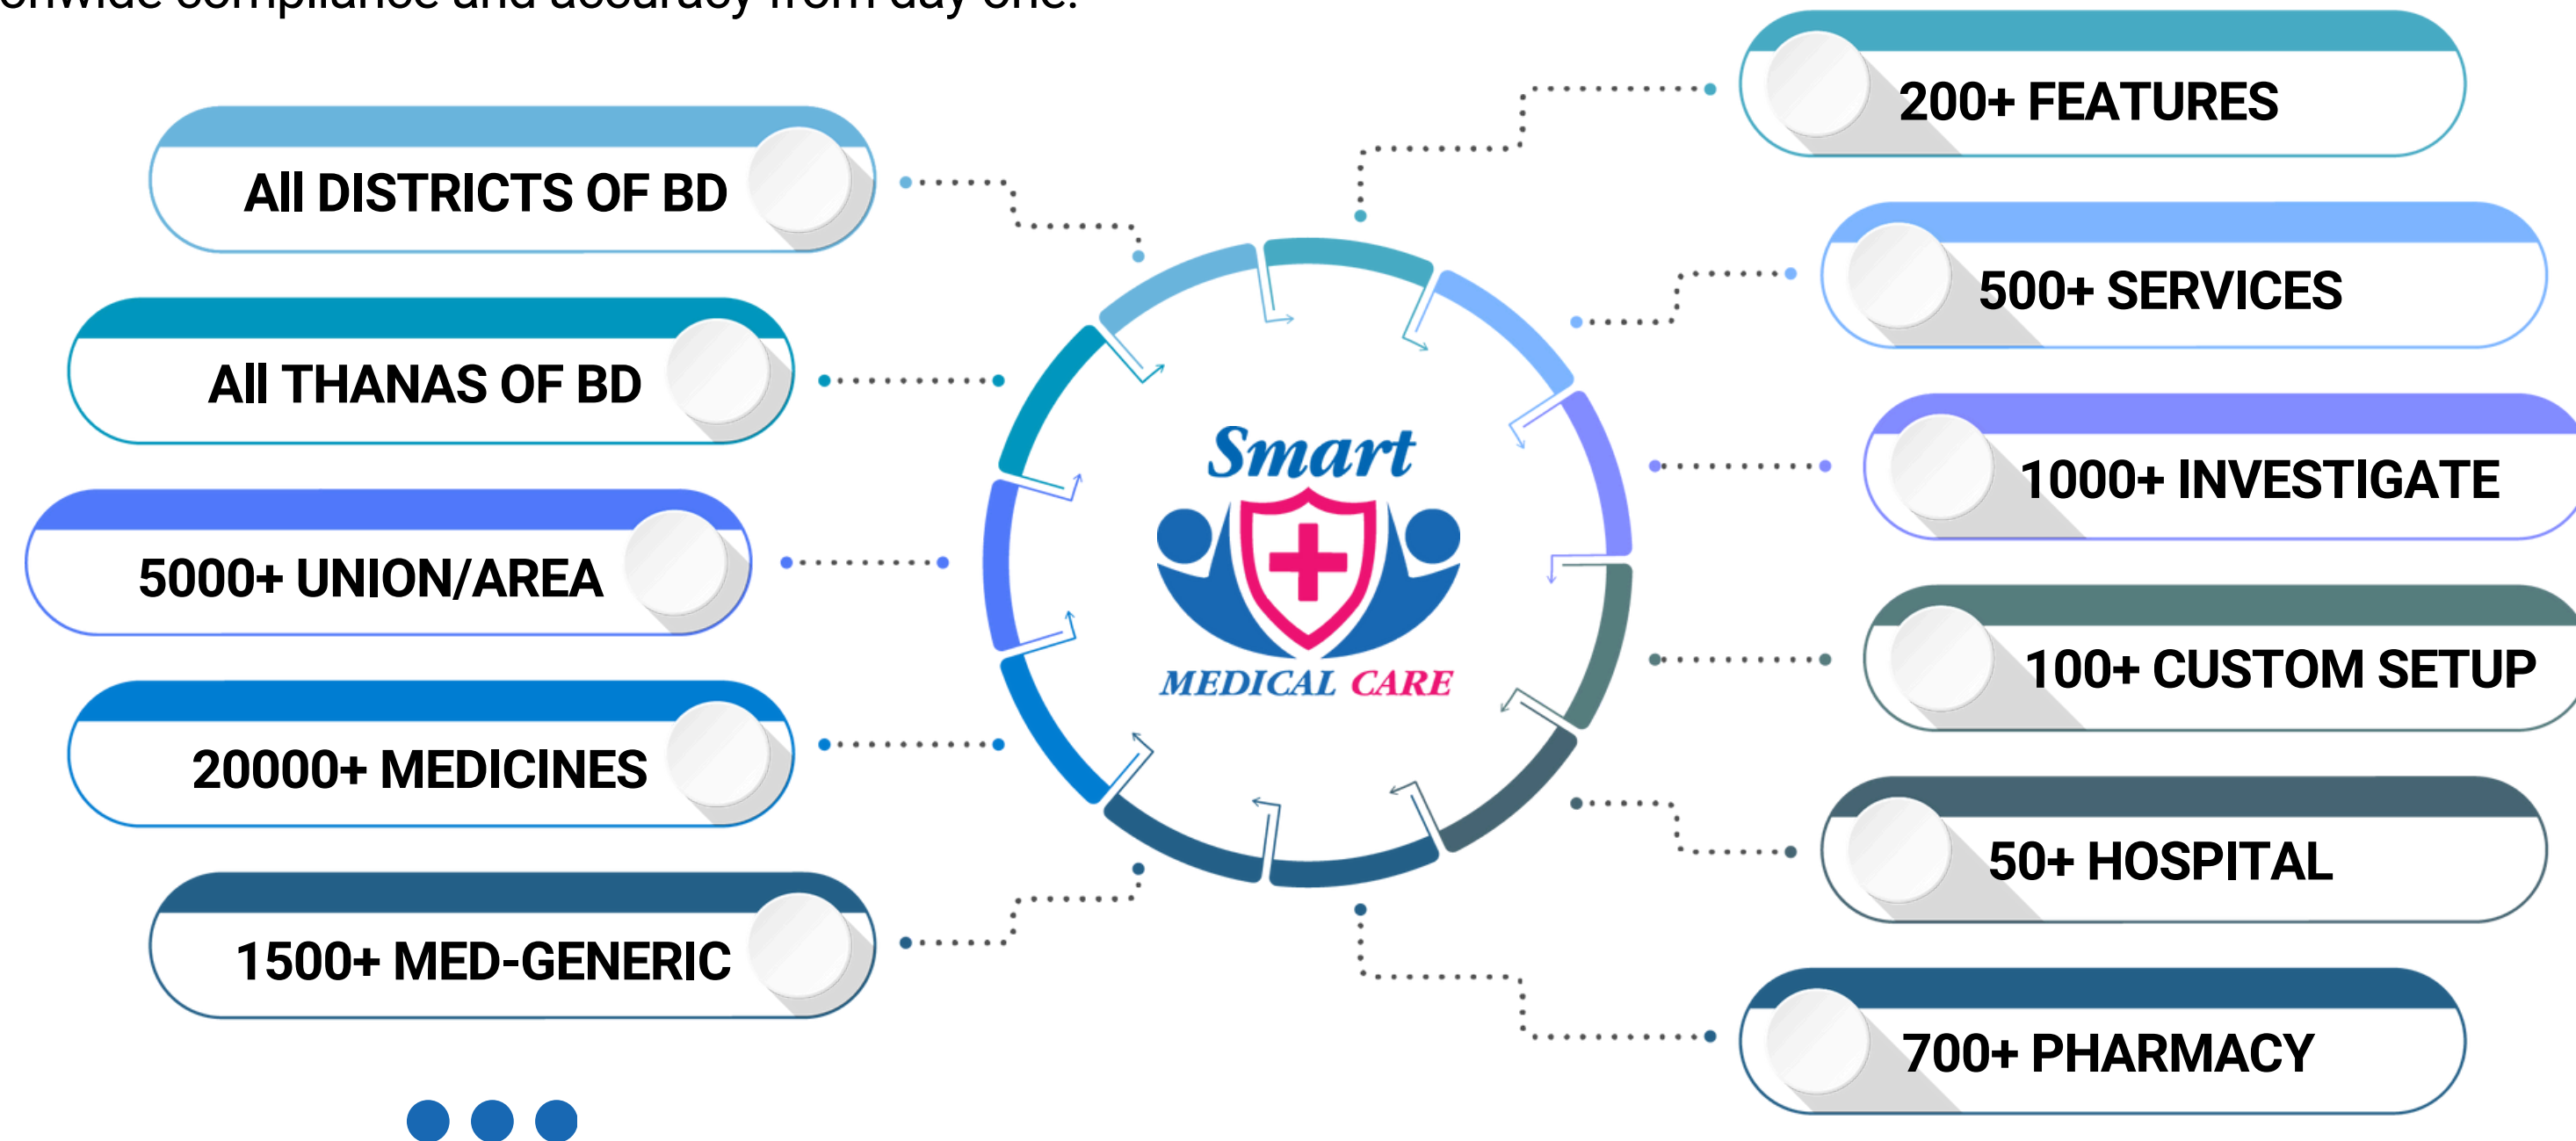

Access critical hospital management features anytime, anywhere, directly from your mobile device.

Integrated Intelligence

A vast, pre-configured data bank that eliminates setup delays and ensures nationwide compliance and accuracy from day one.

Conclusion

Effective hospital management is essential for quality patient care.

Technology and streamlined processes drive operational success.

Continuous innovation and feedback are crucial for improvement.

You have seen how Smart Medical ERP creates a seamless, efficient, and intelligent healthcare environment. This is more than an upgrade—it's a transformation of your entire operation.

The future of your hospital is built on integrated data, streamlined workflows, and exceptional patient care. We provide the foundation.

Stop managing inefficiencies and start leading with insight. Imagine a hospital where every system works in harmony, empowering your team to deliver their best.

**Unlock a new era of profitability and prestige.
Become the undisputed leader your community deserves.**
